Summary

Engineer with hands-on experience building full-stack, GenAI, RAG, AI-agent, and cybersecurity applications using Python, Java, JavaScript, FastAPI, MCP, LangChain, and MERN, with experience in backend APIs and automation.

Education

- **Vignan's Lara Institute of Technology and Science** Vadlamudi, India
B.Tech in Computer Science and Engineering (Artificial Intelligence) — **CGPA: 8.1** 2022 – 2026
- **NRI Junior College** Tenali, India
Intermediate (Class XII) – MPC Stream — **Percentage: 91.2%** 2020 – 2022
- **Viveka High School** Angalakuduru, India
Secondary School (Class X) — **CGPA: 10.0** 2019 – 2020

Internship

- **AI Engineer Intern** May 2026 – July 2026
IIT Hyderabad
 - Built a **Multimodal Self-Healing RAG assistant** using OCR, FAISS, BM25, and reranking for grounded retrieval from legal, compliance, and scanned documents.
 - Designed secure document processing workflows with grounded answer generation, metadata filtering, and semantic search to support regulatory compliance, security policy analysis.
- **Generative AI Engineer Intern** May 2025 – July 2025
SmartBridge | IBM Cloud
 - Developed a **HealthAI: Intelligent Healthcare Assistant** using IBM Granite, enabling real-time disease prediction, patient chat, and treatment planning.
 - Integrated IBM Watson Machine Learning APIs to deliver AI-driven medical recommendations with personalized insights and data-backed decision support with reduced latency by 30%.
- **Web Development Engineer Intern** Jan 2025 – Mar 2025
EY Global Delivery Services | AICTE
 - Engineered full-stack MERN applications including a recipe-sharing platform (**FOODIEE**) and a financial **Expense Tracker**, optimizing state management and database query efficiency.

Projects

- **Automated Full-Stack Application Builder**
FastAPI | Gemini APIs | LangChain | Render | GitHub
 - Built an AI-powered full-stack website builder that generates frontend, backend, database, and API integrations from natural language requirements, reducing development effort by 70% through automation.
 - Designed for dynamic feature updates and automated deployment in full-stack applications.
- **AI Cybersecurity SOC Agent using MCP**
Python | FastMCP | FastAPI | Security APIs
 - Architected an **NLP-based AI SOC Analyst** using FastAPI and FastMCP to orchestrate 6 security intelligence tools (AbuseIPDB, VirusTotal, NVD) for automated threat analysis.
 - Built an LLM orchestration engine to collect JSON evidence and generate automated SOC incident reports.

Technical Skills and Interests

- **Languages:** Python, Java, JavaScript, SQL, HTML/CSS.
- **Areas of Interest:** Generative AI, LLMs, AI Agents, AI Security & Cybersecurity, Full-Stack Development.
- **Relevant Coursework:** DBMS, Operating Systems & Security, Data Structures & Algorithms, OOP.
- **Tools & Platforms:** Model Context Protocol (MCP), FastMCP, RAG, LangChain, FastAPI, MongoDB, GitHub.

Certifications

- **Generative AI in Action** — IBM SkillsBuild.
- **Python Foundation** — Infosys Springboard, Udemy, Cisco.
- **Full Stack Web Development** — Edunet, Udemy.
- **Data Structures and Algorithms using Java** — NPTEL [Elite].
- **Operating Systems and Security, Java Programming Fundamentals** — EDX.
- **Cyber Threat Management, Junior CyberSecurity Analyst** — Cisco.
